Integrated Amplifiers

The **Nēo 220i** Integrated Amplifier offers immense value, delivering unrivaled performance in a distinctive package. Designed with numerous convenient features such as a front-mounted mini-jack for personal media players, the **220i** produces music like no other integrated amplifier in its class.

Versatile and intuitive to use, the **Nēo 250i** delivers a seductive musical performance and represents an outstanding value. Well respected and known for exceptional price-to-quality ratio, the **250i** marries a classy appearance, true MOON-build quality and irreproachable sound quality without equal in its price class.

Incorporating technologies found in our highly acclaimed MOON Amplifiers and Preamplifiers, the **Nēo 220i** and **Nēo 250i** are assembled to our exacting standards. They will deliver outstanding performance with the reliability that has made our products so well known and respected around the world. Nearly thirty five years of experience in the design and manufacturing of award winning high-performance components has paved the way for these integrated amplifiers.

Of course, key features you'd expect in a **MOON Nēo Series** product are present such as SimLink™, RS-232 and IR ports for custom-install environments.
