

Jadis I-300

I300 completes our integrated range. It's equipped with the famous 300B so dear to audiophiles. This tube is well known for its fine restitution of the music.

Technically speaking, its two 300B triodes per channel are mounted in push-pull without feedback. Given 300B specificities, a particular care was taken to research, as for example the need of stable power supply for the heaters. A design feature that allows the I300 to appear much more powerful than its 10W may suggest!

Listening to the I300, it's all about accuracy, subtlety and musicality of the 300B which magnifies your tracks. No doubt it will delight demanding audiophiles triode lovers!

TECHNICAL DATA:

Type	Integrated Amplifier with remote control
Bias	Automatic
Power	10W - Classe A
Input/Output	5 lines, 1 Bypass output, 2 loudspeakers outputs (for bi-wiring)
Bandwidth	20Hz to 55kHz
Sensitivity	100mV
Tubes	4 x 300B, 2 x 6SN7, 3 x ECC82
Dimensions	40 x 40 x 25,5 cm
Weight	40kg
Consumption	200 VA
