

Black Diamond

Smooth, fine detailed and great resolution

while actually reducing apparent harshness. Music is presented as a coherent, organic whole, with a jaw-dropping sense of realism and naturalness.

“it’s amazing and hard to believe, the sound keeps improving getting richer, lusher and more resolute as the hours accumulate.”

“When I first decided to write to you about your Black Diamond Cables (bi-wired speaker and XLR interconnect) I had accumulated about 100 hours of listening time, but held off because the sound quality kept on improving. Even now after about 300 hours, it’s amazing and hard to believe, the sound keeps improving getting richer, lusher and more resolute as the hours accumulate.

My B&W 802D’s have never been happier, responding much faster than ever before!

I would like to thank you and the design team in Langport for doing such a great job developing the Black Diamond series of cables. Your attention to detail and pushing the state-of-the-art is greatly appreciated!

Good cables do matter!!!!

- Jim Rooney, Boston, Massachusetts, USA

“The Tellurium Q Black Diamond speaker cables’ ability to retain drama and at the same time exhibit utmost transparency was demonstrated in a strikingly impressive manner. The xylophone sounds extended almost forever (so to speak) and were sharply projected on the virtual soundstage. It was exciting to “observe” (hear) tones forming in front of me with all the right natural colors/timbres and then slowly fading away. There was lots of air around the instruments and their separation was exemplary. The micro dynamic ability of the Tellurium Q Black Diamond speaker cables was breathtakingly good and great micro dynamic responsiveness is the main reason why some systems sound incredibly vivid and lifelike.”

- monoandstereo.com

“The obvious danger is that the ambitious audiophile will soon want to recable the entire system with Tellurium Q Black Diamond....Such cables really are the stuff recommendations to close friends are made of”

- Frank Hakopians, 6 Moons

“Recommended for being probably the last cable you will need to buy. Stunning performance.”

- Dominic Marsh, HiFi Pig

“... reviewing the Tellurium Q Black Diamond speaker cable. Up to this point I had not found any cable over the last decade that had outperformed the Philosophy Cables loom that had been in situ. Until now. “

- Tony Bolton, Opinion Column HiFi World

Black Diamond Speaker Cable

PRODUCT CODE: BD-SC

Many years ago Tellurium Q produced a speaker cable called the Graphite. While sounding incredible in most systems and winning awards, there were a few that reported that they actually sounded “wrong”, a little thick and heavy. This only occurred on very few systems but gave us something new to launch into researching. (We love a challenge because no matter what else we always learn something new).

The Black Diamond speaker cable was born out of this work. The Graphite speaker cable was referred to as “the best speaker cables I’ve ever heard” by one reviewer but even so the Black Diamonds significantly out perform them without any of the apparent drawbacks of the old Graphite as you will see for yourself reading the reviews and hear for yourself when you plug them into your system.

BANANA

SPADE

Note: All Tellurium Q Speaker cables can be Bi-wired by adding an extra cable during manufacture.

Black Diamond Links

PRODUCT CODE: BD-LNK

The Black Diamond bi-wire link is designed to be used with Tellurium Q Black Diamond or all TQ Silver ranges, to replace the external links that came with your speaker.

Black Diamond Waveform™ hf Digital RCA/BNC

PRODUCT CODE: BD-DRCA, BD-BNC

Keeping the same family sound as the Black but taking it beyond the Ultra Silver on the way to the Silver Diamond. The Black Diamond is the newest in the Waveform line up but sits very firmly in its performance slot of the Tellurium Q matrix.

RCA

BNC

Note: All Tellurium Q Digital RCA cables can be terminated with RCA or BNC connectors.

Black Diamond RCA

PRODUCT CODE: BD-RCA

The previous Tellurium Q reference RCA for one very good reason – they are staggeringly good, detailed and smooth.

Black Diamond Tone Arm

PRODUCT CODE: BD-PHONO

The Black Diamond RCA Phono turntable cable is the Tellurium Q reference level product for very good reason. The sound quality is on a par with the rest of the Black Diamond range - incredible.

This construction has the earth link buried in the main body of the cable itself.

Black Diamond XLR

PRODUCT CODE: BD-XLR

The Black Diamond XLR are Tellurium Q in a cable. The Black Diamond XLR uses our own TeCu connector and is the most natural sounding cable in the range, which is saying something.

Black Diamond DIN

PRODUCT CODE: BD-DIN

We were asked if it was possible to construct a reference level DIN cable and this is the result. The performance is beyond what you might expect simply from looking at it because there seems to be just a simple cable and connector with nothing fancy going on.

Black Diamond Digital Streaming Cable

PRODUCT CODE: BD-DS

The New High performance Digital Streaming cable announced by Tellurium Q. This cable was announced to just a few distributors and already there is only limited first run stock remaining. We have been taken by surprise by the overwhelming response and feedback we are getting. Bringing better detail and a more natural sound than you might expect, performing as it does at the Black Diamond level.
